I yelled out loud and long as the massive weapon powered into me and I started to come all over the place.

Try to relax honey. It won't hurt that much.

The increased blast and fragmentation effect of the OG-7 High Explosive Grenade makes the RPG-7 Anti-tank Rocket Launcher

much more effective against non-armoured targets. As most of the targets presented to terrorists are non-armoured, this sort of grenade seems tailor-made for them.

It felt as though I were on fire as I breathed deeply, deliberately tormenting myself by delaying my climax for a few seconds more. Then I could hold out no longer. With a long groan I let myself go and blasted them.

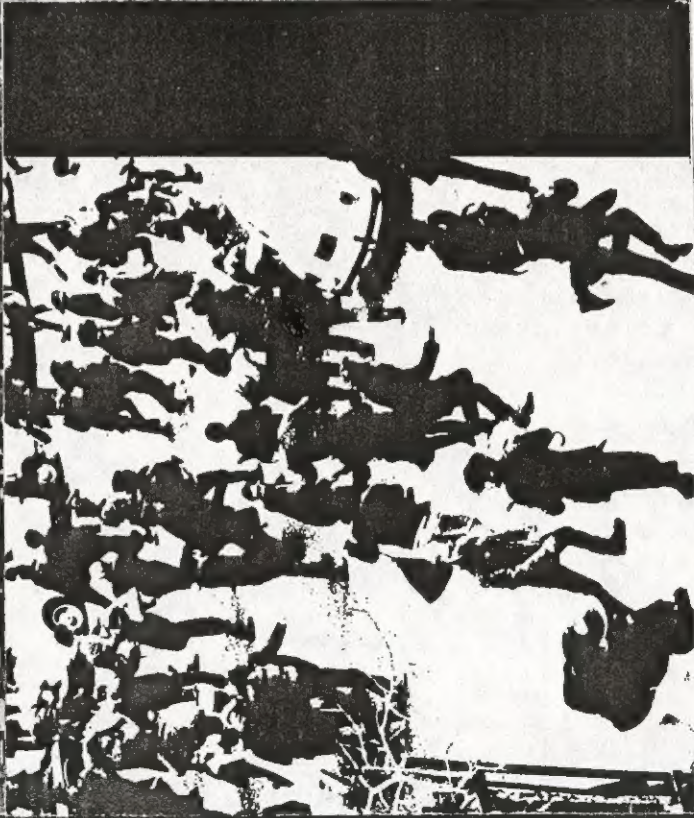

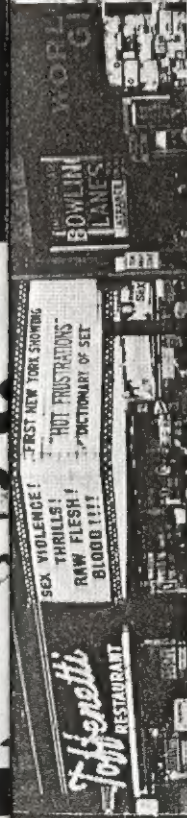

The Armalite AR-18's accuracy and the penetrating power of its small bullet make it a deadly weapon. The bullet can penetrate body armour, medium steel plate and steel helmets at 500 yards and inflict a devastating wound. The shock of even a minor wound inflicted by these high velocity rounds can kill.

The East Germans produce a 7.62mm round with a plastic cap

over the bullet. When such a round hits a target, the plastic cap is forced in by the lead behind it, shattering the plastic

as the lead enters. The fragments cannot be detected by x-rays.

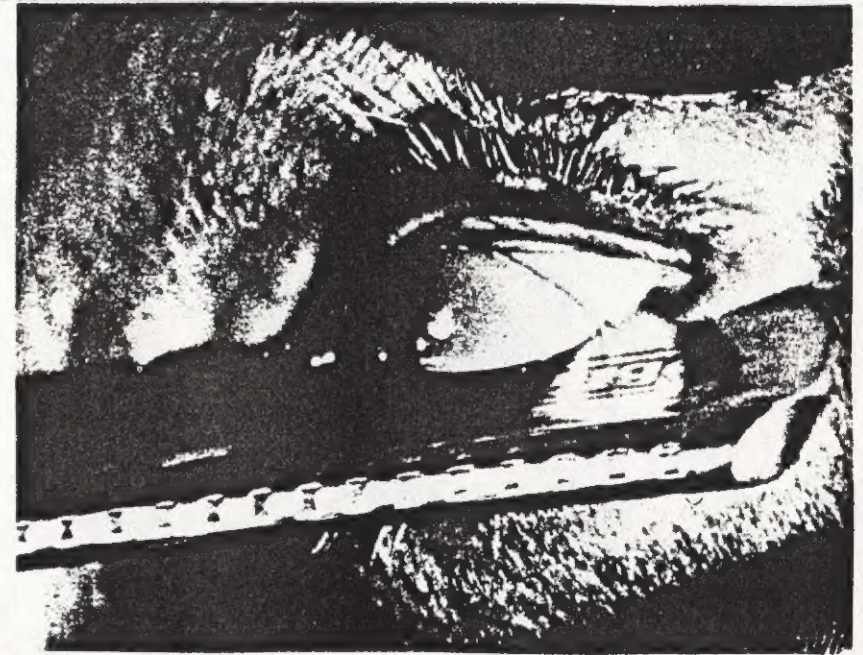

You are the stage.
You are the actor.
Everything is for real.
There is no audience.

COUP DE GRÂCE.

1984.

It is here. 'The Final Incision'. A small overview of subversive graphics from around the world. 123 copies. The first official release from C.D.G., and hopefully the first in a long line of products. The next release will be a cassette by the sound group Coup De Grâce. This cassette will be titled, 'Corpse Education', and if all goes well it will be available sometime in the next 4-5 months. C.D.G. has also been releasing a series of flyers covering many subjects. These are produced in limited press runs and when all the individual flyers run out the complete set will re-released in a limited edition booklet. If you have any questions, or would like more information on C.D.G., please write. Until next time...
